

BEAT INSTALLATION

If not accustomed with this kind of practice, please contact and Harley-Davidson® shop.

Installation

Remove original fender bolts

To do so, is important to hold the fender back bracket in position

Place washers on the provided bolts and insert them into the bag holes

Apply other two washers on the outside and place both spacers (***NB. The longer spacer needs to be placed on the bolt near the seat, and the shorter spacer needs to be placed on the bolt near the blinker***)

On motorcycles equipped with detachable sissybar use the sissybar bushings inseat of the provided spacers.

Place the bag making sure to hold the original fender bracket in place.

Tight both bolts and close the bag
